19<sup>th</sup> January 2022

To whom it may concern,

I am writing this reference letter at the request of Florian Delaplace whom I understand is seeking enrolment on a course within your University.

Florian was employed with Sports Labs Ltd as a research engineer intern between 30<sup>th</sup> August and 17<sup>th</sup> December 2022.

During his time with the company Florian conducted in-depth research and development work which required application of a wide range of engineering principles from mechanical and electrical, to biomechanics and statistical modelling.

The research Florian was tasked with demanded strong problem-solving and communication skills in describing complex interactions and statistical analysis. He showed a high level of self-motivation, which he maintained throughout his time with us. He is forthcoming in offering assistance to his colleagues and continually showed enthusiasm in his work.

Florian quickly integrated into the team, working well with his peers and collaborating with other staff members across our laboratory and research and development department.

I firmly believe Florian's solid work ethic, intuition and technical ability make him a highly desirable candidate for a fast paced and technical learning environment and I'm certain he will exhibit an aptitude to whichever course he has chosen to apply himself in.

Yours sincerely on behalf of Sports Labs Ltd,

Thomas Chilvers MEng MIET

A handwritten signature in black ink, appearing to read "Thomas Chilvers".
